No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 5298399

GENERAL INFORMATION:
APPLICANT: Uozumi, Takeshi; Masaki, Haruhiko;
APPLICANT: Hidaka, Makoto; Nakamura, Akira;
APPLICANT: Madda, Michihisa; Yoneta, Yasuo
TITLE OF INVENTION: Gene of Urease
NUMBER OF SEQUENCES: 14
CORRESSONDENCE ADDRESS:
ADDRESSEDS: Frishauf, Holtz, Goodman & Woodward, P.C.
STREET: 600 Third Avenue
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              2562 ACCTOGCAAGTGCCTCTAGCCCAGCGCTACACTTTCTTAGG
